PROFILE

I am Dev Sharma, an aspiring full-stack web developer with experience as a front-end developer at ByteWorld IT Services, where I contributed to the development of a CRM for the India Property Dekho (IPD) website. Passionate about building intuitive and engaging web applications. Currently, I am working as a React Native Developer at Pearl Organisation, where over the past six months, I have successfully led the development of **Casham**, a finance application designed for seamless user experience and financial management.

PROFESSIONAL EXPERIENCE

MERN Stack Developer & React Native Developer

Pearl Organisation

09/2024 – present

Dehradun, India

- Specialized in using web libraries like React.js and Tailwind CSS, and web frameworks like Next.js for creating reusable UI components, styling, and optimized server-side rendering.
- Proficient in **application frameworks** like React Native to develop cross-platform mobile applications with native-like performance and user experiences.
- Collaborated with a team of 20 developers to ensure smooth project development and timely delivery.
- Utilized Git and GitLab for version control, branching strategies, and efficient team collaboration.
- Focused on implementing responsive designs and optimizing performance across web and mobile platforms.

Front end Developer

Byteworld IT Services

03/2024 – 08/2024

Gurugram, India

- Specialized in designing and developing web applications with a focus on CRM systems.
- Worked on diverse projects using agile practices, ensuring efficient and iterative development.
- Employed GitLab for version control and code management.
- Collaborated with a team of 5 developers for effective project management and deployment.

- ReactJs, Next Js, React Native, Javascript, HTML, CSS, Node Js, Bootstrap, Tailwind CSS, MongoDB, Git, Postman.

PROJECTS

HeadGen AI

HeadGen.ai is a website offering an AI-powered solution for generating professional and realistic headshots. It caters to individuals, professionals, and businesses looking to create high-quality portraits without the need for traditional photography. Users can customize features like backgrounds, attire, and facial expressions, ensuring the generated headshots meet specific personal or professional requirements. The platform is ideal for enhancing online profiles, and branding materials.

Abhiviridhi Porter

Abhiviridhi Porter is a sleek and efficient logistics management platform built with React.js and Tailwind CSS. It provides a seamless user experience for tracking and managing shipments, offering responsive design and intuitive navigation for enhanced usability.

Pilling Admin Portal

Pilling Admin Portal is a secure and scalable backend management system developed using React.js and Tailwind CSS. It ensures streamlined administrative operations with robust authentication and efficient access control.

Reddit

Reddit clone app built with React.js and Redux, featuring posts, likes, comments, profiles, dark mode, and user authentication. Designed to be responsive and user-friendly.

ProductNest

ProductNest is an e-commerce platform with seamless product management, secure authentication, and dynamic cart features, powered by Express.js and MongoDB.

Casham

Finance Application

Casham is a **React Native (Expo)-based** finance application designed for seamless financial management. Currently in early access, it offers intuitive transaction tracking, budgeting, and expense management. Built for efficiency, it ensures a smooth and secure user experience.
